ezymerch

Want your own custom brand colour?

Easy. Your price stays the same when you meet our low minimums for bespoke colour orders.

Now that's Ezy.

Our range of decoration methods makes chosing your product ezy.

	Best for	How it works	Why it's great
Print	Logos, full-colour designs, or text.	Tiny nozzles spray ink directly onto the surface, forming crisp characters and images.	Fast, versatile, and ideal for smooth materials.
Sublimation	Full-colour images, gradients, and complex designs.	Heat fuses the ink and the product together for a long-lasting result.	The colour becomes part of the product – no cracking or peeling.
Heat Transfer	Fabrics and apparel.	A printed film design is heat-pressed onto fabric using water-based inks and adhesives.	Perfect for vibrant, detailed artwork on garments.
Engraving	Metal, wood, and premium finishes.	A laser etches your design into the surface. Note: Engraving doesn't use colour – it reveals the material beneath.	Creates a sleek, tactile finish that won't wear off.
UV Printing	Hard surfaces like bottles, cases, and packaging.	UV lights instantly cure the printed ink onto the surface.	Sharp, durable, and fade-resistant prints in full colour.
Embroidery	Apparel, hats, and uniforms	Thread is stitched into your design for a high-end textured look.	Long-lasting and premium – ideal for bold logos and solid colours.
